

# FIRE DEBRIS REMOVAL AND CLEAN-UP

DRIZIT Environmental will dispatch clean-up teams to attend to the clean-up of debris from factory, warehouse and other structural fires. Specialised equipment and facilities allow DRIZIT to safely decontaminate and clean-up and dispose of post fire debris and waste. DRIZIT will respond 24 hours a day to a fire emergency and assist with environmental protection during the fire fighting. DRIZIT teams are equipped to deal with the following:

- Firefighting water runoff control and disposal.
- Post fire debris clean-up and disposal.
- High pressure cleaning of smoke damaged buildings and facilities.
- Contaminated product transfers.
- Burned stock or raw material removal and disposal.
